

Millennium Busbar System

Millennium Busbar System

The Block is available as an 800A (50KA fault rated) or a 400A (40KA fault rated) busbar for main and secondary distribution boards. It will accommodate most MCCB's, switches, direct connections, switch fuses and neutral links without adaptors. **The 400A and 800A busbars are ASTA certified.**

The Nova is a 150A-250A busbar. It will accommodate MCB's, MCCB's, surge suppressors, earth leakage and other devices at nominal 18 mm, 25 mm, 30 mm & 35 mm outgoing terminal centres at ratings of 6A, 63A, 80A, 100A and the range of MCB's and MCCB's rated at 125A. **The 250A Nova is ASTA certified.**

All Millennium units are fully insulated and totally encapsulated in a composite proprietary matrix filler giving a fault free unit without nuts, bolts, rivets or other loose or fault provoking components.

VT-TRIPLE POLE 250A UNITS

TP way	Modle ref. (c/c outgoing terminals)			
	18 mm	25 mm	30 mm	35 mm
